

TCX Download - On-site Traffic Data Retrieval

Product description:

TCX Download is exclusive to Solagen customers. In recognition of the economic climate and increasing demands being placed on customer budgets, Solagen are pleased to introduce a low-cost data collection and retrieval product that will deliver resource savings and improvements for SAS products. TCX Download offers a data collection package that simply connects to any existing SAS product or purchased with a new unit.

✓ Filter, analyse data:

The system filters and analyses the data from the radar, it detects oncoming vehicles that pass the sign and records their speed with a time/date stamp.

✓ Download to multimedia card:

The collection data is saved to a multimedia card (included in the TCX Download package), once this has been removed from the unit, it can be connected to any computer with a card reader.

✓ Excel compatible:

The data can either be imported straight to Excel or uploaded to Solagen's Sentient website.

✓ Solagen's Sentient compatible:

Additionally, if the data is been uploaded to Sentient, reports can be tabulated including vehicle count, speed and time/date binning and 85th percentile for daily, weekly and monthly analysis.

Overall Benefits of TCX Download:

- ✓ Reliable data collection without dependence on network availability
- ✓ Solar powered
- ✓ Capability to store data for several months
- ✓ Simple integration with SAS units – designed to fit in standard equipment housing
- ✓ Cost effective data management – one off cost, no subscription and no continued power costs
- ✓ Reports in Excel compatible format. It can also be viewed as a text document, or uploaded to use Solagen's on-line tools
